EDUCATION

Indiana University, Bloomington

Bachelor of Science in Business & Informatics (GPA: 3.8/4.00)

May 2028

EXPERIENCE

Project Lead

May 2025 - Present

HUMN AI

Remote

- Led the technical team on website architecture decisions, balancing reliability, scalability, and cost for future platform growth.
- Developed core marketplace functionalities, enabling seamless interaction of digital human avatars, which supported onboarding of 20+ vendors.
- Integrated Stripe payment system into the backend, establishing the groundwork for commercial transactions and secure product licensing.
- Designed full-stack e-commerce architecture using Next.js frontend, Node.js backend, MongoDB document store, and AWS S3 for avatar asset delivery, enabling sub-2s page load times across 50+ product pages.
- Identified new cost-saving dependencies and tools including Clerk and AWS, reducing projected monthly infrastructure costs by 30%.
- Engineered customer cart and wish list features for real-time updates and persistent user storage, boosting user engagement and checkout efficiency.

Head of Business Operations, VP of Marketing, Project Manager

November 2023 - June 2024

ProfessorAI

Seattle, WA

- Evaluated 30 business models, finalizing two profitable strategies: B2B with school districts and Freemium subscription.
- Developed financial strategy along with data analysis for cost optimization and curated list of relevant tactics for executive board.
- Spearheaded marketing campaigns and presented at EdTech conferences. Secured College Board approval for AP content.
- Produced 10+ SEO-driven videos, boosting brand visibility by 80% and expanding outreach via key EdTech officials.
- Optimized IP and open-source licensing, reducing costs by 85% and educating the team on patent law to enhance brand.
- Analyzed competitor reports to provide insights on industry trends, enhancing board decisions and product strategy.
- Defined product strategy and drove the product roadmap aligning to the conceived vision.
- Managed engineering and content team (6 members) for delivering 32 AP courses, boosting productivity with AI solutions by orchestrating LaTeX/KaTeX formatting with dev teams.
- Leveraged Jira, Slack, and Excel to streamline project planning, optimize tracking, and enhance cross-functional collaboration.

National Director of Finance & Alpha Eta Chapter VP of Finance

January 2025 - Present

Kappa Theta Pi Professional Tech Fraternity

Bloomington, IN

- Established the fraternity's first financial infrastructure by researching local banking options, negotiating terms, and successfully opening an initial account with IU-based banks. Developed a structured financial framework to support future budgeting.
- Developed semester budgets and structured member dues, leveraging Excel-based financial analysis to optimize cash flow, allocate resources efficiently, and support executive board decision-making. Set pricing for member dues based on chapter strength and demand.
- Leveraged the Crowded app to streamline chapter finances for 30+ fraternity members, reducing manual errors by automating payment tracking.

Director of Programming and Content

January 2025 - Present

AI In Business @ IUB

Bloomington, IN

- Delivered a keynote talk on generative AI trends, educating members on real-world applications, industry disruptions, and emerging market opportunities. Engaged the audience with insights into cutting-edge AI

developments, fostering discussion on innovation.

- Spearheaded speaker events and educational workshops, connecting students with industry leaders to discuss AI's impact across industries and providing hands-on learning experiences with AI tools.

Technology Consultant

February 2025 - Present

Aperture Consulting Group

Bloomington, IN

- Advised Mesh.AI's development team on AI model feasibility, offering strategic guidance on integrating LLMs while evaluating performance trade-offs. Researched and recommended the most efficient APIs to enhance product scalability.
- Conducted in-depth research on AI tech stacks, analyzing cost-effective solutions, performance metrics, and emerging market trends to recommend optimal, high-performance architectures for scalable and efficient machine learning deployment.
